

Ch. Dhiraj kumar subudhi

Full-stack developer

Hi, I am Dhiraj. I am a full-stack developer with over a year of experience in web development. I started my journey as a developer in 2021 and after that, I have worked at many companies as an intern, and gained experience along the way. I don't define myself by the work I have done but by the work I want to do. I prefer to keep learning, continue challenging myself, and do interesting stuff that matter.

PERSONAL PROJECTS

Crowdcoin

- A DAO(Decentralized Autonomous Organization) app that is used for crowd funding for new startups and companies.
- Used solidity for building the smart contract, truffle for testing.
- Implemented React for Front-end and deployed it on the rinkeby test network at Ethereum.

Decommerce

- A complete e-commerce website with all functionalities starting from user authentication to payment.
- Used React for Front-end, Express for Back-end, and MongoDB for the database.
- Included stripe for payment gateway.

Netflix clone

- It is a clone of Netflix. It has almost all the features (only Frontend) that Netflix has.
- Used Firebase for user authentication.

React games app

- This is a game project where you can see and get information about any game. In this project, I am getting data from an API and Integrating that with Frontend.
