Projects

My portfolio

It is my portfolio listing all my skills good projects and contact information about me.

Netflix clone

It is a clone of Netflix. It has almost all the features (only Frontend) that Netflix. I also implemented firebase authentication in It.

React games app

This is a games project where you can see and get information about any game. In this project I am getting data from an api and Integrating that with my Frontend.

Achievements

As achievements I dont have any certificates or course degrees. But I have experience. I have built some amazing websites and designs. I have worked in some big projects. If am working with someone and he is happy to work with me that is my real achievement.
